

Lasagna

This Green Bean favorite is simply to die for. Tender layers of pasta between perfectly spiced marinara, ricotta and mozzarella cheeses, sweet Italian sausage and ground beef simulate the smells and tastes of an Italian kitchen.

Deep Dish Pizza

Chef Brian's made-to-order deep dish pizza gives Chicagoans something to shout about! Fresh veggies (red, green and banana peppers, red onions, white mushrooms and/or black olives), succulent meats (sugar cured ham, spicy or sweet Italian sausage, ground beef, freshly sliced pepperoni and/or grilled chicken breasts) and an interesting blend of cheeses (mozzarella, parmesan, ricotta and/or Monterey Jack) atop a thick, *buttery crust.

Butter Cream Fettucini w/Garlic

This simple, yet flavorful, concoction is a must for the "picky eaters" in your group. Only one problem -- everyone loves thick fettucini noodles smothered in a creamy, butter sauce, seasoned with fresh garlic cloves, Italian herbs, parmesan and mozzarella cheeses. Order extra!

"Spaghetti and a Meatball"

It's not a typo! Traditional spaghetti noodles in classic Italian marinara sauce with an oversized meatball (cooked slowly to perfection), topped with freshly grated parmesan cheese. Oh, it's more than plenty!

Spicy Italian Sausage Pasta

Don't bother if you can't stand the 'heat!' Chunks of spicy Italian sausage in a classic marinara sauce atop tender and hearty bow tie noodles, topped with freshly grated parmesan cheese.

Fresh-Cut House Salad

Romaine lettuce, home-made croutons, feta cheese with an Italian-inspired house dressing.

Fresh Baked Italian Bread

Slices of *Italian bread with your choice of Belgium imported butter or extra virgin olive oil and freshly blended pesto.

*Prepared by local bakery and is not a Green Bean product.

Aluminum is a sustainable metal and can be recycled over and over again. Aluminum recycling provides many environmental, economic and community benefits to individuals, communities, organizations, companies and industries. Today it is cheaper, faster and more energy-efficient to recycle aluminum than ever before. The aluminum can is 100 percent recyclable and can be recycled indefinitely. The can remains the most recyclable of all materials. Aluminum has a high market value and continues to provide an economic incentive to recycle.
